the past

PHILCO 124T

AMAZING NEW 1½ VOLT FARM RADIO CIRCUIT

Two I.F. Stages give 4 TIMES THE SELECTIVITY and 3 TIMES THE SENSITIVITY of all Farm Radios of the past.

5 SUPER-EFFICIENT PHILCO FARM RADIO TUBES

including new Philco noise-reducing XXB Converter tube and highly-efficient LB-4 tube for tremendous undistorted sound output.

NEW PHILCO BUILT-IN FARM RADIO AERIAL SYSTEM

Just plug in and play! Low Impedance Loop Aerial gives amazing noise reduction and enables you to tune out interference and tune in the station you want more clearly than ever before. In most locations, the Built-In Loop Aerial alone is sufficient for fine, clear reception, day and night.

Adapted for use with Philco Farm Radio Aerial where necessary, for powerful daytime reception of long-distance stations.
