

# You're never alone with a **Transitone** AUTO RADIO

You can order a *Transitone Auto Radio* installed in your present car by seeing your automobile dealer. In buying a new car, just say, "I want it *Transitone*-equipped." The dealer will take care of the rest.

*At last it's here . . . A radio for every car . . . TRANSITONE . . . The most wonderful development in an age of wonders.*

Now you can have a radio in your automobile. You do not have to buy a new car to get it. Permanent, beautiful installations can be made on any make or model of automobile, open or closed. Power, volume, distance, perfect reception . . . why sit at home when you can have all this in your car?

The Automobile Radio Corporation operates, or will operate, installation branches in every

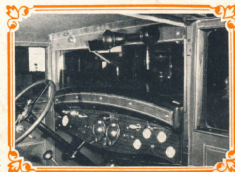

principal city of the country. The *Transitone Auto Radio* is in strong hands. More than four years have been spent in its development. Now it is perfected. It is practical. It is sensational, revolutionary. The automobile made this country prosperous. The radio is a vital factor in maintaining that prosperity. The *Transitone* combines the two. Investigate it today. You cannot afford to be without a *Transitone Auto Radio* in your car.

Now you can have a  
Radio in your  
Automobile

# EQUIP your PRESENT CAR with a Transitone AUTO RADIO

The Transitone Auto Radio is a six tube radio set permanently installed in any make or model automobile, open or closed . . . Its exclusive, patented features overcome all interference created by the running motor. It gives you perfect, clear reception anywhere at any speed.

The set is under the dashboard, out of sight. The aerial is concealed in the top; whether it is up or down makes no difference. The loud speaker is inconspicuously attached above the windshield or hidden under the dash. There is an extra plug for an extension cord by which you can take a loud speaker any distance from the car.

A few prominent **Transitone** installations

# A Radio for every Car

#### OWNERS DELIGHTED

"(The greatest thing yet installed in a car. The very finest instrument I have ever seen . . . very clear . . . changed driving from drudgery to pleasure." "(The finest selectivity and reception that it is possible to get on any radio." "(I continually get Chicago, Nashville, Cincinnati and Denver (from New York)." "(The

greatest addition to an automobile that one could have . . . very satisfactory from both the standpoint of reception and distance and requires practically no attention." "(A remarkable achievement, wonderful results . . . has given me and my family untold pleasure." "(Satisfactory in every way . . . clearness of reception." "(Selectivity and freedom from interference." "(I would not start on a trip without this radio in my car."

"(We congratulate you a thousand times on the greatest achievement in an age of new wonders." "(I am so pleased with the Transitone that I feel it my duty to write you this unsolicited letter of approbation."

The above statements are selected at random from letters received by the Automobile Radio Corporation. You are invited to read the originals in the files at our office.
