I AM LIGHT, SELF-CONTAINED,  
HAVE NO WET BATTERIES THAT NEED  
RECHARGING, AND I COST ONLY  
**9½ GUINEAS** (WITHOUT THE DOG)

THE *Philco*  
BATTERY PORTABLE

# THE MOST PORTABLE PORTABLE MONEY CAN BUY— AND IT'S ONLY 9½ GUINEAS!

GOOD-BYE to old man wet accumulator, the spoil-sport of portability. Philco give you a new Battery Portable that has *no* wet accumulator, nothing that might cause a mess.

By using dry batteries in conjunction with a special (and exclusive) technical arrangement, Philco have evolved a set that is virtually self-supporting for 120 hours of radio reproduction.

This little set can be carried anywhere—on its front or back, or even upside down, without any risk. Not that you'd want to, but that gives you an idea of the advantages of "no-accumulator-power".

The set itself is a powerful four-valve superhet that requires no aerial, no earth, no external attachments of any kind at all. Two wavebands, medium and long. And the cabinet is an absolute picture, and likely to remain so—it's washable!

The speaker fret is reinforced so that you won't be able to put your foot through it, and the whole set weighs only 15½ pounds, including batteries.

Go to your nearest Philco Dealer without a minute's delay and hear this amazing set made by the World's Largest Makers of Radio Sets.
