REMOTE CONTROL

Tune from your armchair!

MODEL D732, Baby Grand, complete **16** GNS.

Extra lengths of cable (12 feet long) available with plugs at both ends

At last you can have absolute and complete control over every operation in tuning a radio without moving from your armchair. On-off, ordinary manual tuning over *three* wavebands and *mechanical Automatic Tuning of eight of your favourite stations*—the world's in your lap!

Take the Remote Control Unit anywhere in the room you please. Put the set itself anywhere you please—you'll never have to touch it, so you can put it out of reach.

The set itself is a powerful seven-valve all-wave superhet and is fitted with a special Auditorium Speaker giving excellent tone. There is a choice of cabinets—Baby Grand or Concert Grand. They are both finished in highly figured walnut, and the Concert Grand has a well, with piano lid, fitted in the top for storing the Remote Control Unit.

Why not have a demonstration? It will be an interesting experience.
