

New PHILCO Model 090

COMPLETE RADIO TESTER

Leaves Nothing to be Desired

Here is Philco's latest, finest complete portable Combination Tester — Model 090. In every respect this is truly a "DeLuxe" instrument — in appearance, performance and reliability.

Consists of the outstanding new Model 077 A.C.-operated All-Wave Signal Generator (list price, \$45.00) and the famous "025" time-proven Circuit Tester (list price, \$60.00) fitted into a specially built portable leatherette case, with extra space for test leads, connectors, etc. This DeLuxe combination unit represents the ultimate in precision-built quality . . . it is without question the finest equipment available to servicemen or dealers for making any and all radio tests. Utmost precision and dependability under all conditions is assured with Model 090. An instrument you will be proud to own and one that will prove a genuine investment for future profit.

Philco Model 099A Portable

RADIO SET-TESTER

Accurate - Beautiful - Rugged - Complete

This high-quality, complete Philco Radio Test Unit, Model 099A, combines the two essential service units — the famous Model 088 Signal Generator and the new efficient Model 026 Circuit Tester — mounted in a special walnut finish case with removable lid, containing complete instructions on the inside.

Portable and requiring no outside power, this unit can be used anywhere to perform any and every necessary type of service test. At the low net price of \$52.50, you cannot find a better value anywhere in a completely portable quality radio testing equipment.

NEW 1938 PHILCO MODEL 066

TUBE TESTER

Philco Auto-Radio Dealers and Service Stations will welcome this high-quality, low cost, complete, modern Philco tube tester. Developed by Philco engineers after a careful and extensive survey and analysis of the serviceman's needs today.

Model 066 gives the only absolutely dependable test because it applies a check that covers all characteristics of the tube at once . . . showing overall performance rating and condition . . . the actual output of the tube under the equivalent of broadcast receiving conditions.

The method of testing used is extremely simple . . . anyone can quickly become adept. A complete chart — especially developed by Philco — including every type of tube, with positions of controls shown for each type, is conveniently mounted alongside the control panel, for quick handy use.

No other tester on the market has all these new desirable features . . . plus sturdy, compact construction and smart, trim appearance. An instrument you will be proud to own, and one that will be a permanent investment that will increase your income right from the day you buy it.
