

THIS ONE COMPUTER

will handle all four types of data processing

COMMERCIAL • SCIENTIFIC • MILITARY • INDUSTRIAL

The Philco 2000 Computer is the most versatile large scale data processing system available today. This one computer can handle efficiently all four major types of data processing problems, each usually requiring a different system.

The high speed input-output system updates an inventory of 500,000 items in less than 20 minutes; large complex scientific computations are now being solved in one fourth the time formerly required; and Philco 2000 Computers are now solving problems vital to the national defense effort.

The Philco 2000 is easily utilized for any of these applications. Parallel logic and asynchronous mode of operation permit expansion without costly changes in system design or existing programs. This extreme versatility is one more reason for the proven economy of the Philco 2000 . . . the computer that has changed the industry.
