

Serving in the EARTH SATELLITE  
PHILCO TRANSISTORS

Philco Transistor Radios are powered by regular flashlight batteries that deliver many hours of listening enjoyment most economically. Philco Transistors place so little drain on the batteries that they are the most economical to operate on the market today. Philco Transistors were chosen to serve in the Earth Satellite.

Pioneer in the Transistor Age

Philco Festival of Sound

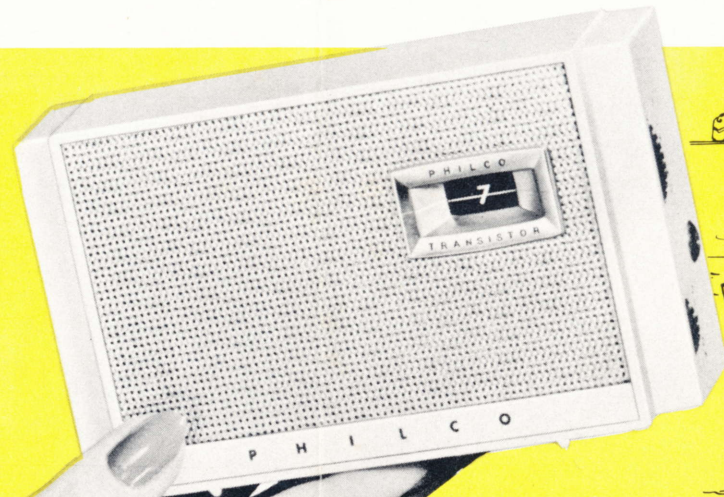

## Philco All-Transistor Radios Go Wherever People Go

On ships, on trains, on airplanes. Though pocket-size and featherweight, Philco All-Transistor radios deliver the power and tone you would expect from full-size table radios. Operating on tiny transistors they

deliver many hours of entertainment most economically on regular flashlight batteries. Practically indestructible, Philco was the first to guarantee its transistor radios for a full five years.

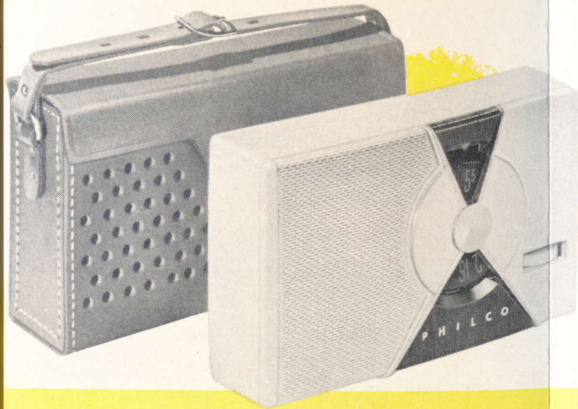

- Philco Magnecor Antenna
- Proved Printed Circuitry
- Private Listening Jack
- 2 3/4-Inch Round Speaker
- Break-Resistant Cabinet

**PHILCO T-500.** New pocket-size all-transistor radio with 5 transistors. Operates many hours on only 4 tiny, inexpensive pen flashlight or mercury batteries. Private listening jack. Nothing near its size has such fine tone and outstanding performance. Sleek modern styled cabinet. Two-tone ivory and black. Five-year guarantee.

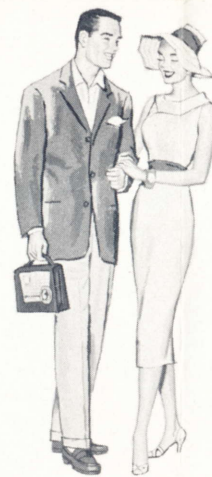

# Star Performers in the Philco Festival of Sound

◀ **PHILCO T-7.** World's finest performing compact transistor radio. Highly sensitive, it has brilliant tone. Operates on 7 transistors and gives many hours of listening pleasure most economically on just two regular flashlight batteries. Break-resistant case in black and ivory. Five year guarantee.

Rich-looking carrying case of genuine cowhide leather. Shoulder sling style lets you carry it anywhere you want, just like a camera.

- **POWER OUTPUT:** More than ordinary portables with tubes.
- **PUSH-PULL CIRCUIT:** Delivers clear, undistorted reception from far-off stations.
- **BATTERY OPERATED:** Operate on regular flashlight batteries.
- **FOUR TUNED IF CIRCUITS:** Greater sensitivity and over-all performance.

Models T-7 and T-500

**WORLD'S  
FIRST RADIOS  
WITH A FULL**

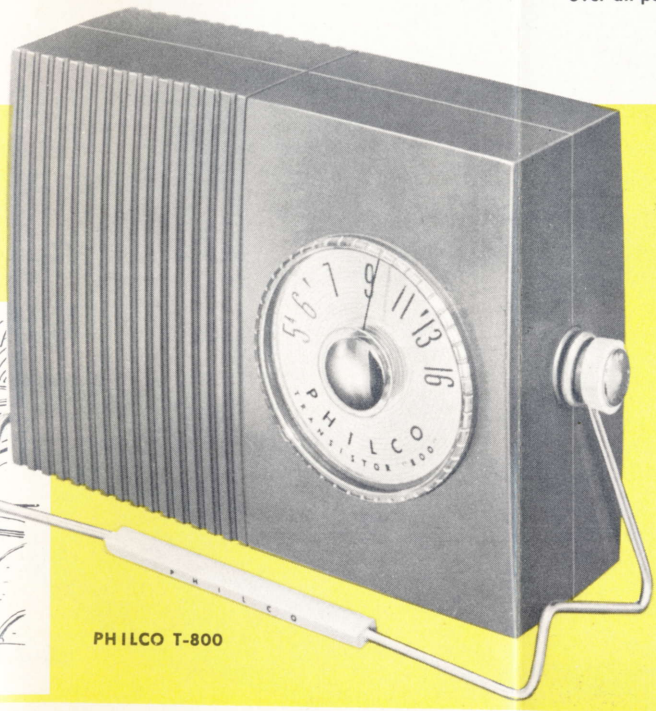

**5  
YEAR**

**UNCONDITIONAL  
GUARANTEE**

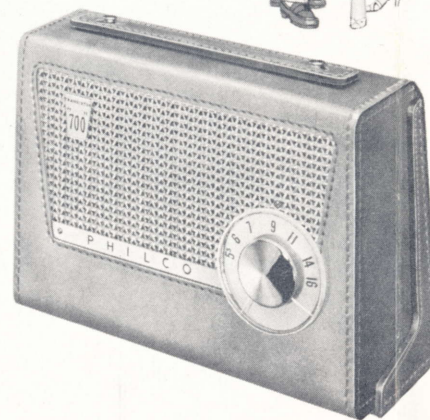

So dependable for long life and so perfect in performance, Philco was first to guarantee its all-transistor radios for a full five years.

Models T-7 and T-500 carry this sensational guarantee . . . a major step forward in the radio industry!

▶ **PHILCO T-800.** Most versatile transistor radio made. Operates on four regular flashlight batteries. Four tuned IF circuits and printed circuitry. 7 transistors allow it to operate on the least current in radio. New detachable handle multiplies its convenience. Gleaming turquoise break-resistant case.

**PHILCO T-800**

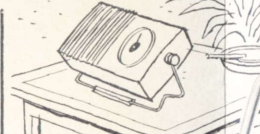

**PHILCO T-700.** Finest performing transistor portable ever built. 7-transistor set that operates economically on four flashlight batteries. Four tuned IF circuits and Alnico V magnetic speaker. Over-sized audio transformer. Luxurious, leather-like case.
